Art Unit: 1615

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-4 and 13-17, drawn to a tablet comprised of a cyclic phosphodiesterase inhibitor and a saccharide, classified in class 424, subclass 465.
- II. Claims 5-12 and 13-17, drawn to a tablet comprised of a pharmaceutical agent saccharide, surfactant and water-soluble polymer, classified in class 424, subclass 489.

The inventions are distinct, each from the other because:

while in each instance a separate distinct method is used. Group 1 provides a method for forming a GMP phosphodiesterase inhibitor tablet. Group 2 provides a method for forming a tablet comprised of any pharmaceutical agent utilizing a method having distinct steps.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1615

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
